

Maarif Ur Rehman

• • • Front-End Developer /
Software Engineering Student

ABOUT ME

Co-founder of UserCentral, a startup specializing in IT services and consulting in Dubai and Karachi. Overseeing a hybrid workplace focused on adaptability and creativity, I drive business development, establish growth-oriented collaborations, and implement BPO solutions. Skilled in delivering web applications, web services, and graphic design projects using React, NextJS, Python on Django, Linux, Kubernetes, and Git.

Currently pursuing a BTEC International Level 3 Foundation Diploma in Information Technology at DeMont Institute of Management & Technology, with a focus on problem-solving applications, networking, and automation. Acquired certifications in API testing and Git fundamentals, enhancing skills in web development and cloud computing.
